User Interface

[4/27/2020](#) – That in addition to the many features outlined in [our previous post](#), there is a *special* search function within F1 Help?

[12/30/2019](#) – That you can refresh **PartsWatch** *without* logging out?

[2/26/2019](#) – That screen help is *now* available from *every* screen in the application?

[08/30/2018](#) - How To turn “on” (enable) new application menu items?

[05/17/2018](#) - That you can access the **PartsWatch News** site, that you see on your application’s SYSTEM NEWS screen, from anywhere, at any time?

[05/05/2018](#) - The most efficient way to contact PartsWatch support is to use our self-service support portal?

[04/26/2018](#) - That there are a variety of functions in the F1 Help screen for easier navigation and accessibility?

Invoicing

[5/10/2021](#) – That you can do a “**smart-search**” from the CUSTOMER LOOKUP field at Point-of-Sale?

[3/22/2021](#) – That there are several part options accessible from a “**hamburger**” style menu right within the catalog results?

[1/25/2021](#) - That **PartsWatch** automatically finalizes and prints invoices for sourced items when the POs for those sourced items are received?

[5/25/2020](#) – That you can add a line item note to *any* part on an open sales order (invoice)?

[12/16/2019](#) – That there is a **PW Mobile** application?

[10/28/2019](#) – That you can set up a “**job**” in the ACES catalog for quicker part lookups?

[10/14/2019](#) – That there is a PW **standard invoice form** for you to try out?

[06/01/2018](#) - That you can find the **ACES catalog part types** you are looking for by using the **Part Search pop-up** without first selecting a group, subgroup and part type?

[05/24/2018](#) - That you can see the new lines added into the WHI Catalog each month right from within PartsWatch?

[02/02/2018](#) - About the following options on the **ACES Catalog screen**?

A/R

Closeouts

Purchasing

[11/25/2019](#) – That you can use the ORDER CREATE screen to import a single or multi-store Purchase or Return Order from a file?

Add-Ons

[03/22/2018](#) - You can use PartsWatch’s integration with our third party partner, **ChargeltPro**, to easily set up, manage and process your **credit, debit and gift cards** tendered at POS?

Utility Options

[8/17/2020](#) – That you can run a report to see if your application’s background (BG) processor is down?

Reports

[4/19/2021](#) – That you can easily find out if a part is an alternate?

[2/23/2021](#) – That you can use **relative dates** on most report screens to select a date range so much faster than typing in the start and end date?

[4/14/2020](#) – About the PRINT QUANTITY drop-down on the INVENTORY COUNT REPORT screen?

[1/27/2020](#) – That you can run a **Task Scheduler** report or even a “batch” of reports on a daily, weekly, or monthly basis, and you can set them up to run automatically overnight so that when you arrive at the store the next morning, the EOD or EOM reports have already been printed. To save paper, you can even have them saved to a desktop folder.

[03/29/2018](#) - That you can view your **sales and gross profits**, within any reporting period, using ten different user-selected “account groupings” by running the **Sales By Account Group Report**?

[02/22/2018](#) - That you can “track, audit and review” any changes made to the nine different “part costs” fields below in the application?

[02/15/2018](#) - About the **Advanced Criteria button** found on many inventory report screens?

PC Setup

eCommerce

Inventory

[06/08/2018](#) - If you’re still setting your stocking levels manually, the **Set Min Max Order Point** part utility can be used to calculate new MIN, MAX and / or ORDER POINT point quantities for you, based on selected sales history periods?

[03/10/2018](#) - That after you perform an **inventory cycle count**, you can then use DFIU to update the Quantity Available for a list of parts?

[01/31/2018](#) - There is a feature called **Quick Quote** that lets you create and retain a quote without checking the available quantity as each item is added to the quote. This avoids additional steps when some parts do not have sufficient quantity. This lets you quickly provide a total invoice price to a customer. Once the customer agrees to the price, then the parts can be sold from the shelf or sourced as needed.

Customer

[8/3/2020](#) – That you can search the Find Customer/Find Account pop-up in different ways?

[3/5/2020](#) – That in addition to setting up any existing Customer Price Plans, you can now also set up **promotional campaigns** for your customers?

[9/30/2019](#) - That in addition to setting up any existing Customer Price Plans, you can now also set up **promotional campaigns** for your customers?

[03/15/2018](#) - That you can use “**Cost Range Pricing**” on the Customer, PRICE PLAN SETUP screen?

Vendor

[7/20/2020](#) – That you can order your parts from your suppliers without renaming your line codes?

[6/9/2020](#) – That you could rename your line codes?

[04/06/2018](#) - That you can send a **Purchase Order (PO) via email** just by clicking the **PLACE ORDER** button on the PO DETAIL screen?

Controls

[11/11/2019](#) - That you can create a list of accounts to be accessed quickly at Point-of-Sale, so you don't have to remember the account numbers?

[04/23/2018](#) - That you can set a **lowest allowed gross profit margin percent** (e.g. 10%, 20% or any percent of your choosing) for all parts sold at the counter?

[04/12/2018](#) - That you can save paper costs by not printing **zero deposit invoices**?

[03/01/2018](#) - That you can receive a **text message** or **email** when a PO fails to transmit successfully?
